## SKILLS SUMMARY

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js, Tailwind, Framer motion, HTML5/CSS3, Zustand, Redux, Ember.js, React Native
- **Backend:** Django, FastAPI, Node.js, Nest.js, Express, Ruby on Rails, Celery, Redis, PostgreSQL, MySQL, MongoDB, Prisma, Drizzle, Supabase, Sequelize, Prefect, Kafka, GraphQL
- **AI/Agentic:** OpenAI API, LangGraph, Vector DBs, Langchain, Python, pyTorch, WebSockets
- **DevOps/Cloud:** Docker, AWS, GCP, Nginx, CI/CD, Kubernetes, Google Cloud Storage
- **Design/ Collab Tools:** Figma, Adobe XD, Git, GitHub Actions, Jira, Slack, Vercel, Linear, Discord, Trello

## EXPERIENCE

- **Nutricheck** Feb 2025 – Present  
*Full Stack Engineer (Contract)* Remote
  - Engineered a sophisticated AI automation system in Python using LangGraph for stateful, multi-agent workflows, integrating a vector DB and PostgreSQL for context-aware data processing and exposing services via FastAPI.
  - Developed a full-scale AI SaaS frontend in Next.js, Tailwind, and Framer Motion, covering dashboards (biomarkers, food plans, recommendations), chat UI, landing pages, and lab reports. Added multimodal features like wearable integrations (Google Fit, Strava, Garmin), real-time WebSockets, voice mode (Speech-to-Text), and AI-powered Q&A via image/file uploads. Also built an admin dashboard and no-code assessment builder with Vue.js/Nuxt and a reusable Storybook library for UI consistency.
  - Architected the core backend REST API using Nest.js, implementing complex assessment logic, secure JWT-based user management with TypeORM and PostgreSQL, and seamless integration with Google Cloud Storage.
- **KIWIQ.ai** Feb 2025 – Jun 2025  
*Founding Frontend Engineer (Contract)* Remote
  - Led the frontend rebuild of an AI automation platform in Next.js, Tailwind, and Framer Motion, architecting a modular, workflow-based drag-and-drop UI for creating interactive agentic pipelines.
  - Developed internal component libraries and dynamic form builders with integrated validation, significantly improving developer velocity and UI consistency across the application.
  - Owned design-to-production frontend delivery, collaborating with product/design teams to translate sketches into polished, motion-rich, responsive UIs that improved UX across devices.
  - Created targeted demo applications to showcase end-to-end capabilities with LinkedIn's APIs, leading to the successful approval and full access to their protected developer platform.
- **QPe (Appernity Technologies)** New Delhi  
*Full Stack Engineer* Sept 2023 - Dec 2024
  - **Full-Stack Product Development:** Built and scaled Next.js-based dashboards and UIs, delivering high-performance, responsive experiences for 100k+ monthly visitors, while collaborating on backend systems (Django/Python).
  - **Client Projects Delivery:** Led full-stack delivery for global clients including [tore.ai](#), [easyvsl.com](#), [tribetale.com](#), [surveytale.com](#), and [usertale.com](#) using React, Vue, Ember, and Ruby.
  - **Cloud and Architecture Ownership:** Designed multi-user systems, secure auth flows, real-time activity tracking, and handled deployments on AWS/GCP for scalable infra.
- **DroptheQ** Noida  
*Frontend Developer* Aug 2022 - Aug 2023
  - **Performance Optimization:** Engineered responsive React components for restaurant service platform, reducing average page load time from 3s to 2.5s and improving user retention.
  - **User Experience Enhancement:** Pioneered feature implementations and UI optimizations, leading to a 4.5/5 star user satisfaction rating.
- **FlixStock India Pvt Ltd** Remote  
*UX/UI Designer / Frontend Developer* Dec 2020 - July 2022
  - **Prototype Development and User Engagement:** Crafted high-fidelity Figma prototypes for 10+ key features, significantly boosting user engagement and driving rapid product adoption across multiple markets.
  - **Agile UI Design and Implementation:** Designed intuitive interfaces with Adobe Creative Suite, adhering to aggressive 2-week sprint cycles and successfully shipping 3 major UI overhauls in 6 months.

## PROJECTS

- **Draw Together [Live] [Github]:** Real-time collaborative drawing app for 50+ users with custom tools and scalable state management. **Tech:** Next.js, TypeScript, WebSockets, Redis
- **Paperly [Live] [Github]:** Research paper organizer with AI-powered analysis, PDF management, and collaborative notes. **Tech:** Next.js, Prisma, PostgreSQL, OpenAI API
- **Lingo [Live] [Github]:** Video captioning tool with keyboard shortcuts, SRT/VTT export, and FFmpeg integration. **Tech:** Next.js, Tailwind, Postgres

## EDUCATION

- **Indira Gandhi National Open University (IGNOU)** New Delhi, India  
*Bachelor of Computer Applications*  
*Courses:* Operating Systems, Data Structures, Analysis Of Algorithms, Networking,
